

# Leveraging Your Advisory Board Resources

An engaged advisory board is critical to providing students in Linked Learning pathways with quality career learning and work-based learning experiences. They serve as professional mentors to young people, build students' social capital and professional networks, help develop curriculum and projects that integrate real-world applications of the industry theme, provide feedback on student work, and connect students to high-quality work-based learning experiences. As COVID-19 persists, it is more important than ever to engage industry partners on pathway advisory boards to keep students linked to their college and career goals.. These tools and resources, from the Alliance's [Leveraging Your Pathway Advisory Board to Engage Industry Partners And Keep Students Connected To Purpose](#) webinar, can be used to build an advisory board that supports college AND career readiness for all young people in your pathway.

## Overview and Framing

### [Webinar Recording](#)
