LINKED LEARNING PATHWAY DESIGN FUNDAMENTALS

Monday November 9th and November 16th 3:00-4:30 p.m. PST

Linked Learning Pathway Design Fundamentals

What: The workshop will focus on the structures and practices that underpin the design of equitable Linked Learning pathways. Participants will use the National Equity Project's Liberatory Design Framework and the Linked Learning Silver Standards to design, develop, and improve their pathway program of study with a focus on equity and impact.

Outcomes:

1. Understand how to use the Linked Learning Silver Standards to design and improve your pathway.
2. Leave with tools, templates, and strategies to design and improve your Linked Learning structures and practices (e.g. industry partnerships, integrated program of study, instructional shifts, and college AND career readiness).

Participants will:

1. **Explore** the Linked Learning pathway framework together with equity-centered design thinking.
2. **Learn** to use the Linked Learning standards and equity-centered design to build a more effective college AND career pathway.
3. **Create** a sustainable plan to successfully meet your pathway goals with tools and strategies you can take back to your site and implement with your team.

Day 1: Linked Learning Pathway Design

1. **Opening and Welcome**

2. **Develop Mindsets for Equitable Linked Learning Pathways**
   - Explore strategies, mindsets and models to design Linked Learning pathways that achieve equitable student success.
   - Consider how to design an integrated pathway with an inclusive and diverse group of stakeholders.

3. **Use Linked Learning Standards to Develop an Equitable and Integrated Program of Study**
   - Explore how the Linked Learning Silver Standards and equitable design can support the development of an integrated program of study.
   - As a team, use an equity lens to review and discuss exemplar integrated programs.

Linked Learning Alliance
730 Harrison Street, 3rd Floor
San Francisco, CA 94107

- As a team, consider the current state of your program of study and identify next steps in developing a plan to meet your goals.

4. **Reflections, Appreciations, Next Steps, and Closing**

Day 2: Linked Learning Design and Fundamentals

1. **Opening and Welcome**
2. **Assess and Reflect on Integrated Program of Study**
    - Use the Linked Learning Self-Study Tool, Silver Standards, Certification and other resources to reflect on pathway efforts to date.
    - Explore how to use these tools and resources with your team to engage diverse and inclusive stakeholders as part of the pathway design process.
3. **Develop a Roadmap for Pathway Design**
    - Develop action plan for how you will use these tools, resources, and process with your team in your context.
    - Network and share plans with other teams for feedback.
4. **Reflections, Appreciations, and Closing**
